Date Funded (first funding):	January 15, 2009	City:	Louisville
Date Repaid ¹ :	N/A	State:	Georgia

¹If repayment was incremental, please enter the most recent repayment date.

American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP) and Community Development Capital Initiative (CDCI). To answer that question, Treasury is seeking responses that describe generally how the CPP/CDCI investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP/CDCI investment was deployed or how many CPP/CDCI dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.

What specific ways did your institution utilize CPP/CDCI capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP/CDCI funds were outstanding).

☒ **Increase lending or reduce lending less than otherwise would have occurred.**

See Below for explanation

CPP ANNUAL USE OF CAPITAL SURVEY - 2011

NAME OF INSTITUTION

(Include Holding Company Where Applicable)

The Queensborough Company

To the extent the funds supported increased lending, please describe the major type of loans, if possible (residential mortgage loans, commercial mortgage loans, small business loans, etc.).

Increase securities purchased (ABS, MBS, etc.).

Make other investments.

NAME OF INSTITUTION

(Include Holding Company Where Applicable)

The Queensborough Company

What actions were you able to avoid because of the capital infusion of CPP/CDCI funds?

As a result of the CPP capital injection, the bank has been able to maintain lending to our core small business customers including farmers. In 2010, the company entered into a formal agreement with the OCC and Federal Reserve whereby the company and the bank agreed to maintain capital ratios of above 8.00% for the leverage ratio and above 12.00% for the total risk based capital ratio. Without the 12,000,000 capital injection from the CPP, we would not have been able to meet the above ratio requirements. Instead, we would have been required to reduce our lending to our core small business customers including farmers so that our total loans and total assets would decline significantly in order to meet the capital ratio requirements. It has been more than beneficial to our company to be able to meet the capital requirements and continue to meet the needs of our customers, which makes us very appreciative.
